Assignment

Each of you will present a report on your assigned author with your group. Every member of the group will present one of the topics listed below during the class presentation.

With your group, prepare a 15-20 minute power point presentation about your assigned author that includes the following information:

- The author’s biographical information (birth, death, important life events)
- Major contributions of the author to fiction
- A list of the author’s major works (with publication dates)
- Reception of the novel
- Relevant print sources (5) for the author described briefly
- Relevant internet links (5) for the author described briefly

Your presentation should be well-coordinated and well-rehearsed. Stumbling through the presentation by reading from the screen as if you have no knowledge of the presentation’s content will not earn you full credit. In general, technically simple presentations work best.
